

The quickest & easiest way
to create expense reports

FOCUS: ABUKAI lets people focus on their jobs and mission - no matter how remote

ABUKAI Expenses allows users to focus on their jobs and what they are meant to do, instead of countless hours of bookkeeping, accounting and paperwork.

Users just take photos of their receipts, hit "submit" and receive the finished expense report. ABUKAI fills out all the information needed in the report for them and automatically labels and arranges the receipt images.

Furthermore, the way ABUKAI is designed, ABUKAI does not need Internet connectivity to collect expenses. Users can take pictures of their receipts even in the most remote locations without connectivity.

ABUKAI only needs to connect when the user hits "submit," sending the data to ABUKAI to create the finished expense report. ABUKAI can connect through whatever network your mobile device uses, including both cellular networks or Wi-Fi. This also allows users to avoid roaming charges when travelling internationally by submitting receipts over Wi-Fi at hotels, airports or when they are back in their home country. There is no need to fill out online forms, or use special office equipment to get the expense reports done. This makes ABUKAI ideal for use in remote environments!

Case Example: In 2002, Kate Evans started research on elephants in the Okavango Delta, with the help and support of Elephant Back Safaris (EBS) and the Ministry of Environment, Wildlife and Tourism. Her research is focused on adolescent male elephants and the transition from herd to bull life with an emphasis on research into the viability of releasing elephants into the wild from a captive environment. The charity, Elephants For Africa, was set up in 2007 to support this research, a scholarship program and an outreach education program.

Before ABUKAI, Kate had to collect all the receipts for the charity expenses, scan them in, manually convert all the currencies, and then fill out a rather complicated expense form. Kate is a scientist and educator at heart, and all this paperwork was a distraction.

Now with ABUKAI Expenses, she just takes photos of the receipts and is done. She no longer has to worry about lost receipts, and ABUKAI takes care of filling out her expense forms. Even though there is often no connectivity or only spotty coverage when she is out in the field or travelling throughout Africa, she can continue using ABUKAI Expenses anywhere she goes due to the unique ABUKAI design. With ABUKAI, Kate can focus fully on her work and her passion!

"ABUKAI Expenses is saving me 7 hours every month! And I can use ABUKAI anywhere - even in the middle of the bush, without infrastructure!"

As a small charity I have to be a scientist, educator, accountant, PR officer, Fundraiser etc. and so my time is valuable and the less I have to worry about the accounting the more time I can focus using science and education to conserve the African elephant."
