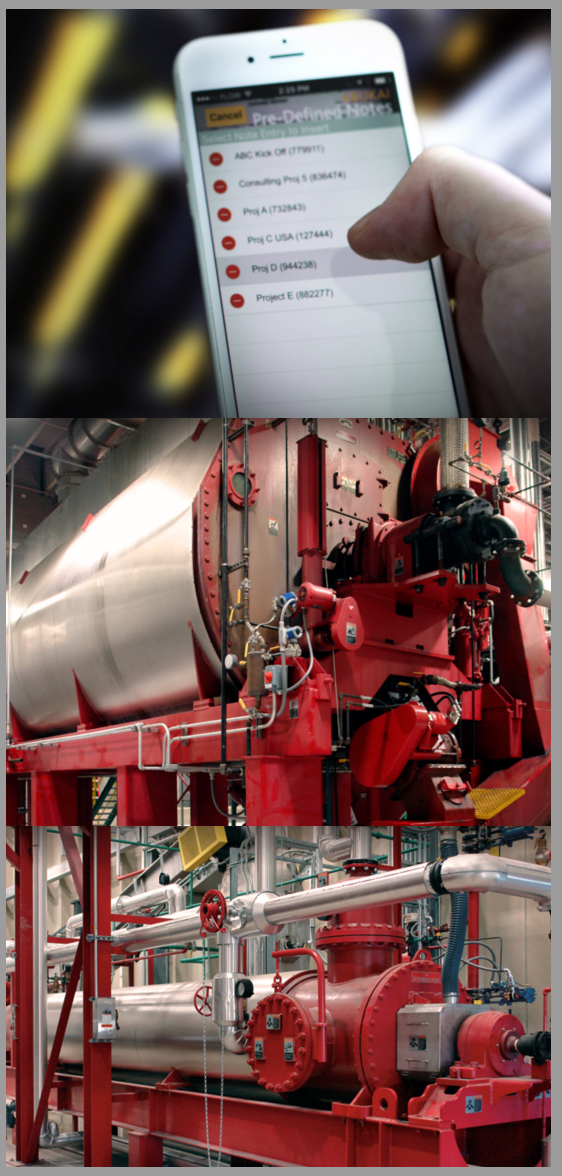
The quickest & easiest way to create expense reports

Manufacturing / Food Processing: Empower your field employees and streamline your back office.

ABUKAI provides a great way to keep track of expenses incurred by manufacturing companies. **ABUKAI Expenses** is easy to use for staff globally either out in the field or in the office - whether meeting with prospects or clients, or supporting an important product delivery or implementation project. ABUKAI eliminates all the cumbersome work associated with expense reports including typing data from receipts, converting foreign currency expenses, and categorizing the expenses. Employees spend less time completing expense reports which allows them to better focus on the core business such as closing prospects, supporting client projects, and ensuring the right products get developed and manufactured. Less paperwork can also mean better margins for the business. How ABUKAI works:



Step 1. Simply take a picture of each receipt or email in receipts.

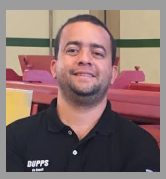
Step 2. Press "Submit" whenever you are ready.

Users will receive their finished expense report with cost categorization, date, vendor, amount and all the other information already filled in. In only 2 steps! ABUKAI can also configure approval flows for corporate customers and support direct integration with ERP systems or manufacturing specific backend systems. ABUKAI also supports the automatic reconciliation of credit card expenses if required.

Instead of having to manually enter each expense entry, with ABUKAI Expenses, users only need to take a picture of the receipt anywhere business takes them. ABUKAI's custom corporate accounts can be tailored to fit manufacturing companies needs with accounts to also support those companies where not everyone is a frequent traveler and the company still wants everyone to have access to ABUKAI when needed.

ABUKAI also offers capabilities to scan supplier invoices and more effectively manage suppliers through either ABUKAI Expenses or its separate **ABUKAI Invoices** suite.

Case Example: DUPPS Do Brasil designs, manufactures and services process systems and equipment. DUPPS is a worldwide leader in protein recycling systems and service. The company has focused on renewable resources, starting with rendering companies around the world that recycle millions of tons of animal byproducts every year. DUPPS offers a comprehensive range of protein co-products processing equipment, service and support for red meat, poultry and fish meal applications. DUPPS Do Brasil has recently rolled out ABUKAI Expenses to more effectively track their expenses. ABUKAI automatically reads and recognizes Brazilian receipts as well as from all other



"Before ABUKAI, we would take hours processing field employees' receipts. This was an extremely difficult task because there were receipts that were rubbed out because they had been badly stored, or torn.

Now, with ABUKAI, hours and hours of work were simplified by getting the reports in just a few minutes. At DUPPS Do Brasil, we're very happy with ABUKAI and are committed to ABUKAI as our expense platform."

Leandro Ferreira, General Manager
DUPPS Do Brasil
